Graduate Credit is available through DWU-Mitchell.

Next year's conference will be February 6, 7, & 8, 2020.

Featured Speakers

BANQUET SPEAKER — **Dr. Kristopher J. Childs** is a National Content Specialist with Houghton Mifflin Harcourt. He has vast experience at the K-12 and post-secondary levels in teaching and leadership positions. His experiences have afforded him the opportunity to gain hands-on practical experiences in a variety of educational settings working with diverse student populations. Dr. Childs has been recognized by faculty, staff, and students as a visionary and collaborative leader. He will fire us up in our Opening Session Friday morning in Prairie A & B and is our

Banquet Speaker Friday evening. He is also doing two sessions Saturday morning at 8:00 in Dakota F and 10:00 in Dakota E.

OTHER FEATURED SPEAKERS

Sara Van Der Werf is a nationally board-certified teacher who taught secondary mathematics for Minneapolis Public Schools for more than 25 years. Additionally, Sara led the professional development, curriculum writing and strategic planning for K-12 mathematics. Sara frequently speaks at the state and national levels, including keynoting conferences and leading professional development on a variety of topics. Sara is active in the national mathematics community via twitter, @saravdwerf, and her blog,

saravanderwerf.com. Sara's sessions are in Dakota E on Friday at 8:30 & 3:30 and then Saturday at 8:00.

Sara Byre's focus at South Dakota Manufacturing & Technology Solutions is marketing. She is responsible for maintaining the company's social media platforms, promoting events, and building client relationships. In this role, she is also responsible for managing the "What's So Cool about Manufacturing?" student video contest. Sara's Friday sessions start at 8:30 in Dakota B, 1:10 in Dakota E & 2:10 in Dakota B; Saturday in Dakota B at 9:00 & 1:40.

Kim Soper is a professional development specialist with the University of Nebraska Medical Center. She hosts teacher trainings, develops high quality, culturally relevant science and math content for students and teachers, and leads and develops science camps, workshops, and science festivals across Nebraska and South Dakota. Kim's sessions start in Dakota A on Friday at 11:20, 2:10 & 3:30; Saturday at 10 & 12:40.

Mollie Gabrielson is the Instruction and Fidelity Manager at the US Math Recovery Council®. Throughout her 18 years in education, she has assumed a variety of educational positions. She holds a M.S. in Curriculum and Instruction from BHSU and holds a Reading Specialist Endorsement from the USF. Ms. Gabrielson is passionate about empowering teachers to understand how children make sense of mathematics and how to move each child forward in

their mathematical understanding. Working with Mollie is 21-year veteran educator

Mike Busch. In his current role as an Outreach and Training Manager, Mike actively works with districts to arrange for and implement professional development opportunities that empower teachers to improve mathematics teaching and learning for all students. Their Friday sessions are in Dakota F starting at 8:30, 10:30, 1:10, & 3:30; and on Saturday, their session is in Dakota E starting at 1:40

2019 SD STEM Ed Conference

South Dakota Council of Teachers of Mathematics South Dakota Science Teachers' Association

The meeting rooms for all sessions are in **The Crossroads Hotel/Huron Events Center**

Conference Kick Off Thursday, 7:00 – 9:00

T102 Math Pot Luck SDCTM

Network with other math teachers! Share your favorite activities and lessons! Swap teaching ideas! Sharing math teaching ideas will be the focus of this session. Bring 25 copies of your favorite activity to share. Leave with ideas from other great teachers. **Pizza will be provided for those who attend!**

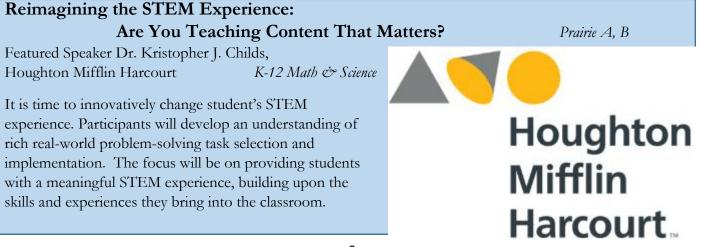

T103 Science Showcase SDSTA

In celebration of the 50th year of the Periodic Table, bring an activity to share with colleages that relates to elements, chemistry, or the Periodic Table. (Feel free to get creative describing this link - everything can connect to this ordered version of the elements). Share your lesson with a link on social media, send to officers@sdsta.org to post to the page, or bring copies to share. **Pizza will be provided for those who attend!!**

Breakout Session 1 Friday, 8:30-9:20 AM

F103 Open Education Resources (OER)

Dr. Judy Vondruska, South Dakota State University

This session will provide general background information on open-educational resources including what constitutes OER, sites to locate resources, and an overview of research on the usage of OER. The presenter will also relate her experience in implementing OER materials in her astronomy classroom at SD State.

F104 What is Technology? What is Engineering?

Marie Steckelberg, EdD, Steckelberg Consulting SteckelbergConsulting.com marie@steckelbergconsulting.com

Engineering and technological literacy are embedded in the SD Science Standards. We will examine familiar objects to develop a better understanding of the term "technology". Then, you will experience the engineering design process as you take on an engineering challenge.

F105 FEATURED SESSION:

The Best Manufacturing Resources for Your Classroom

Sara Byre, South Dakota Manufacturing and Technology sdmanufacturing.com

Look no further for advanced manufacturing curriculum and fun learning activities for your classroom! This presentation will cover the top websites educators can use for gathering free STEM lesson plans, videos, and manufacturing games to supplement learning. Learn about off-site activities including how to set up manufacturing

tours and what STEM camps and events are available in SD.South Dakota.

F106 Desmos Card Sorts and Polygraph: Awesome Digital Tools for Any Classroom

Mark Kreie, Brookings High School markkreie.blogspot.com mark.kreie@k12.sd.us

Come learn how Card Sorts and Polygraph activities from Desmos can help facilitate learning and generate great discussions in your classroom. Participants will learn how to access existing Card Sorts and Polygraph activities as well as how to create their own. Expect to leave the session with something to use in your classroom the following week. All Desmos tools are free. Intended for grades 5-12; bring an iPad or laptop.

F107 Adventures in Chemistry (the Self-Paced Kind)

Sabrina Henriksen, Rapid City Area Schools - RCHS sabrina.henriksen@k12.sd.us

I went on an adventure this year and designed my chemistry class to be self-paced. I want to share my stories with you. Come join a discussion about how this is going and find out what I'm celebrating and what I'm changing.

F108 FEATURED SESSION:

Engaging Students in Seeing Mathematical Structure

Sara VanDerWerf, VanDerWerf Educational Consulting saravanderwerf.com saravdw@gmail.com

Students who identify mathematical structure find and use efficient strategies to solve problems. How can we help students see the structure of mathematical concepts before we name it for them? Practical strategies that engage students in noticing structure will be modeled with specific details for implementation in the secondary classroom.

F109 FEATURED SESSION:

Student Understanding: What Do We Really Know?

Mike Busch, US Math Recovery Council Mollie Gabrielson, michael@mathrecovery.org

This session will explore video from assessment interviews with students to gain insight on the current understandings and strategies of several individual students. Session participants will watch video of students working to solve a variety of math problems. We will use our observations and knowledge to create current profiles of student understanding.

F110 The Balancing Act of Effective Scaffolding

Stephanie Higdon, SD Department of Education stephanie.higdon@state.sd.us

Giving students the right amount of support during math can be a challenge at all levels, kindergarten through high school. What is the most effective way to create a culture in your class where students feel supported and are truly engaged in their learning? Come have rich discussions and engage in active learning strategies with colleagues around best practices to support students, without "telling" students how to think.

As a member, you may attend and vote at the Friday 5:30 Business Meeting. Science=Dak A Math=Dak E

Dakota F Elementary Math

Dakota G K-12 Math

Breakout Session 2 Friday, 9:30-10:20 AM

F201 Meet the Future Teachers

Larry Browning, South Dakota State University Larry.Browning@sdstate.edu

Prospective science and math teachers from all South Dakota institutions are invited to engage with practicing science and math teachers attending the conference. The goal is to provide support and encouragement for future teachers by having experienced teachers share advice, success stories, and useful strategies.

F202 A National Park Summer

Hannah Caffee, Harrisburg School District hannah.caffee@k12.sd.us

In love with National Parks? Spend a summer as a Teacher Ranger Teacher. In this session you will hear about one TRT's experience, and start planning your own.

F203 Desmos Snapshots: A New Tool to Help Facilitate Classroom Conversations

Mark Kreie, Brookings High School Brody Gilbertson, SDSU Teacher Candidate markkreie.blogspot.com mark.kreie@k12.sd.us

Snapshots is a new feature added to the Desmos Teacher Dashboard. Designed with the "5 Practices for Orchestrating Productive Mathematics Discussions" in mind, Snapshots provide a way for teachers to select, sequence, and connect ideas. In this session, participants will learn how to access the Snapshots tools and receive best practice tips about how to use them. All Desmos tools are free. Intended for grades 5-12; bring an iPad or laptop.

F206 Trees Around the GLOBE

Cassie Soeffing, Institute for Global Environmental Strategies globe.gov/web/trees-around-the-globe/overview cassie_soeffing@strategies.org

Tree height is not just a measurement - it is a gateway to understanding many things about the environment. The structure of tree canopies has a huge effect on how ecosystems function and cycle through carbon, water, and nutrients. Used in conjunction with the GLOBE Observer App, Landcover tool, students as citizen scientists will be part of a project to create more detailed satellite-based global maps of land cover by sharing photos of their world.

Share the Classroom Treasures

Stop in Salon II and see what is there.

F207 Claim-Evidence-Reasoning: Use Inquiry to Develop Scientific Explanations about Phenomena

Amber Gunner, STEMScopes agunner@acceleratelearning.com

Claim-Evidence-Reasoning (CER) is a way for students to explain observed phenomenon in a scientific way. This structured approach allows students to use observations and data from an investigation. Students use critical reasoning to connect the claim and evidence together. CER is an acclaimed and highly successful instructional strategy that is changing how students understand concepts and write explanations for phenomena.

F208 Mastery Learning

Dakota E

Dakota D

Science

Diedra Nissen, Kiki Nelsen, Roosevelt High School, SiouxFalls School District9th-12th Math

How to implement a mastery learning assessment model in your classroom to increase understanding and keep students engaged year long.

F209 Making Math Fun with Gamification

Kevin Smith & Brandi Antonsen,Dakota FDakota State UniversityK-8 MathJenna Grossenburg, Aberdeen OMT Elementary Schoolkevindsmith.org/chasing-einsteinkevin.smith@dsu.edu

Do you want your students to be excited about math and reinforce the math practice standards at the same time? We'll share info on how to do that. Chasing Einstein is a collaborative project between preservice teachers at DSU and students in 5th-7th grade classrooms. We'll tell the story and give you ideas for your own classroom.

SOUTHEAST TECH

F204 FEATURED SESSION:

Notebook Foldables

Kim Soper, UNMC

Turn notebooks into 3-dimensional, individual, and brain-smart tools, while using classroom-tested strategies for success coupled with Dinah Zike's Foldables to challenge and intrigue diverse students. Go home with a mini-composition book constructed on-site. We will use an Earth Science theme.

F205 TIES Resources - Teacher Institute for Evolutionary Science

Alison Bowers, Hanson School District Bertha Vazquez, TIES - Teacher Institute for Evolutionary Science tieseducation.org

This double-session helps teachers teach evolution with confidence. The first hour will cover materials and we provide a full unit, including exam, for you to take home. The second hour covers hands-on activities and labs to engage students in evolutionary science. Let's make evolution fun and relevant!!

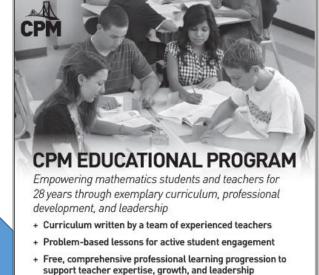

F210 Empowering Students to Make Mathematical Connections

Dakota G 6th-8th Math

Julie Jackson, Cathy Quinlivan, CPM cpm.org juliejackson@cpm.org

Participate in activities that make connections between a pattern, table, graph and rule. Help students move through the representations, while developing a deep understanding of multiple ways to solve problems and to communicate that understanding verbally and visually. Teachers will receive ideas and materials that they can use in their own classrooms.

Visit with Conference Exhibitors to be qualified to win valuable prizes at the noon meals

+ Educational nonprofit 501(c)(3)

We are pleased to support the SD STEM Ed Conference. Stop by our booth to meet with a CPM mentor teacher, see our materials, and request a preview.

Dakota A 6th-8th Science

Dakota B

6th-12th Science

Breakout Session 3 Friday, 10:30-11:20 AM

Purposeful focus on increasing student talk is an effective and efficient way to ensure that student learning is visible. Research verifies that typically, teachers speak 70-80% of the time. This session focuses on "easy to use and implement" K12 strategies to increase the amount and quality of student discourse.

F301 Dialogue Not Monologue - Effective Student Discourse

Deb Wolf, Julie Dahl, Sanford Underground Research Facility - BHSU

F302 PowerUp Airplanes

sanfordlab.org

debra.wolf@bhsu.edu

Julie Olson, Mitchell Senior High/Second Chance High School julie.olson@k12.sd.us

Construct and fly a powered paper airplane. Learn lesson applications.

F303 Robotics Team? No problem! Start a BEST Robotics Team

Gail Jacobsma & Kelly Keller, Arlington High School 6th-12th Math & Science Gail.Jacobsma@k12.sd.us Think your school and students would love to have robotics team but believed that you didn't know enough to start one? Have no fear! The Arlington BEST Robotics Team and their advisors Gail Jacobsma and Kelly Keller

will convince you that, "Yes, YOU CAN!" The group will demonstrate & share their work and robotics in the Exhibitor Hall.

F306 Tracking Mosquito Using GLOBE Observer Mosquito Habitat Mapper Tool

Cassie Soeffing, Institute for Global Environmental Strategies globe.gov/web/mission-mosquito/overview cassie_soeffing@strategies.org

GLOBE Mission Mosquito's student research campaign connects students of all ages to monitor changes in the frequency, range and distribution of potential disease vector mosquitoes by reporting observations using the GLOBE Observer Mosquito Habitat Mapper mobile app (FREE download at

https://observer.globe.gov/about/get-the-app). These data can be easily uploaded from the GLOBE database and analyzed to explore a variety of research questions examining connections between land, water, air and life in the Earth system.

Banquet Tickets? There is a limited number of extra banguet tickets still available. Check with Sheila at the Registration Desk. - 9 -

Friday, 11:20-11:50 AM

Networking, Exhibitor, and Poster Session

Thank You:

Conference attendees have the opportunity to network and visit with Exhibitors and enter door prize drawings. Exhibitors have color coded tickets for drawings. These tickets will be given out in the exhibition hallway at the discretion of the exhibitors. Keep one half and place the other in the drawing buckets at the registration table. The more booths you visit, the better your chances to win a prize! Drawings for this session will be held during Friday lunch and you must be present to win!

F309 FEATURED SESSION: Differentiation Without Going Crazy - Using Progressive Mathematization to Design and Adjust Instruction for the Elementary Mathematics Classroom

Dakota F Mollie Gabrielson & Lucinda (Petey) Maccarty, US Math Recovery Council Elementary Math mollie@mathrecovery.org

Classroom teachers are asked to differentiate; however, many are not given any resources or guidance in how to accomplish this task. The dimensions of progressive mathematization include the techniques of Extending the Range of Numbers, Distancing the Setting, Complexifying, and Notating, which can help teachers routinely differentiate for all students. Participants will learn what each technique requires and explore the application of these to differentiate tasks and lessons.

F307 Using Stellarium to Teach Astronomy Concepts

Dr. Judy Vondruska, SDSU

Stellarium is free, open-source planetarium software for your computer. It can be used to learn the constellations, understand the motions of planets/stars/moon, find deep-sky objects, travel through time and space and much more. Please download on your computer prior to the session from http://stellarium.org/.

Friday, 10:30-11:20 AM

B08 Multiplying Binomials (Scaffolding Technique for Review)

Darrin Merrival, Pine Ridge School darrin.merrival@bie.edu

Multiplying polynomials using the area model. I have the students engaged by telling them they have to complete one step of the problem on the board at the end. Repeated as session 508

- 10 -

NASCO and CAROLINA Biological

For donating gift certificates for the conference.

Exhibitor Hallway

Dakota E 9th-12th Math

9th-12th & College Science

Dakota D

Lunch: *Prairie A, B, & C* Friday, 11:50 AM-12:50 PM

Come for a meal, awards, recognitions, and raffle with swag from vendors and other amazing organizations! Hosted by Presidents of SDSTA and SDCTM. Awards to be presented include Outstanding Biology Teacher, Outstanding Mathematics Teacher, Outstanding Physical Science Teacher, Daniel Swets Robotics Materials Award and Kelly Lane Earth & Space Science Grant.

Friday, 12:50-1:10 PM

Networking, Exhibitors, and Poster Session

Conference attendees have the opportunity to network and visit with Exhibitors and enter door prize drawings. Exhibitors have color coded tickets for drawings. These tickets will be given out in the exhibition hallway at the discretion of the exhibitors. Keep one half and place the other in the drawing buckets at the registration table. The more booths you visit, the better your chances to win a prize! Drawing winners from this session will be placed on the TV screen in the exhibit area - prizes must be claimed Friday!

Breakout Session 4 Friday, 1:10-2:00 PM

F401 Wireless Data Sensors

Larry Browning, Physics, South Dakota State University Matt Miller, Chemistry/Biochemistry, South Dakota State University Larry.Browning@sdstate.edu

Wireless data sensors from Pocket Lab and Vernier can provide easy and accurate data for labs. Participants will have an opportunity to use this equipment and see how it can be used in classrooms. Teachers with this equipment are invited to come and share their activities.

F402 Twenty-First Century STEM Skills Through Studying Mars Prairie B & C

Gail Jacobsma, Arlington Junior High Gail.Jacobsma@k12.sd.us

Arlington 7th grade students have been learning 21st century skills and expanding their STEM horizons through the study of Mars. They would like to showcase their Giant Mars Map and VEX IQ robots from Buzz Aldrin's ShareSpace Foundation. They will be sharing their Mars base models, Mars rovers, experiments with hydroponics and engineering notebooks. Please come listen to their presentations and ask them questions!

F404 Science Speed Dating

SDSTA-SDCTM Officers, SDSTA-SDCTM www.sdsta.org; www.sdctm.org officers@sdsta.org

Join us for our Professional Development Speed Dating Session! We've got 50 minutes to get you as much info as possible. There will be at least six different topics (TEAMS Competition, English Tips & Tricks, STEMYSTUFF, Evolution Activities, Egg-cellent Osmosis, SD Breeding Bird Atlas); for those you are interested in, stop by their table; at the switch, you can visit another table or take your new idea and head off to another session. Come and go as you please. Sit where you like and get the information that pertains to you! Check Registration Desk for hand-out of specific information.

F405 Badlands Erosion and Deposition	Dakota B
Ed Welsh, Brad Barker, Julianna Ellis, Badlands National Park	K-8 Science
nps.gov/badl/index.htm	
edward_welsh@nps.gov	

Join us for a brief classroom activity that helps illustrate the circumstances that shaped the badlands and the geologic history of South Dakota, along with discussion on other earth and life science oriented learning opportunities with Badlands National Park.

F406 SD HOSA: What is it and how to get it at your school!	Dakota C
Brock Rops, SD HOSA with	6th-12th STEM
Lisa Fuccello, Brandon Valley High School and Lisa Cardillo, Harrisburg High Sci	hool
sdhosa.org	
lisa.fuccello@k12.sd.us	

During this informational session, we will be covering statistics/data regarding health care professionals and student interests in South Dakota. We'll discuss what HOSA is and explain the competitive events that it offers to students. Finally, we'll discuss how to start a HOSA chapter for those wanting more information.

F408 FEATURED SESSION:

Teaching Mathematical Ideas vs. Tricks

Sara VanDerWerf, VanDerWerf Educational Consulting saravanderwerf.com saravdw@gmail.com

Why should we be teaching mathematical concepts before practicing skills? Many of us have worked to shift our teaching towards teaching concepts first and have found it difficult to make a shift. Practical ideas of making this shift work for you and your students will be shared to make this transition successful for both teachers and students.

F409 FEATURED SESSION:

Building Bridges...Not Walls! Moving Student Towards Flexible Computational Strategies

Mollie Gabrielson, Mike Busch, US Math Recovery Council Elementary Math mollie@mathrecovery.org

In this session, we will examine a detailed progression of counting types and explore the underlying complexities of children's counting-based strategies. Counting strategies for addition and subtraction are significant advancements for students, but it is critical that students' progress beyond counting-by-ones to other strategies that are based on 'structuring numbers'. Students need to develop much more knowledgeable ways of adding and subtracting numbers. In this session, we will explore how to support students in their development of more efficient ways to develop accuracy, flexibility, and fluency within addition and subtraction 20 and beyond.

Middle School Math

F410 Visible Algebra

Deann Kertzman, Black Hills State University bhsu.edu deann.kertzman@bhsu.edu

Beginning in first grade, learners solve for unknowns in various addition and subtraction settings. By third grade, learners are using a letter for unknowns in multiplication and division settings. Fourth grade adds multiplicative comparison. Why then are middle school learners often frustrated with the transition from arithmetic to algebraic thinking? This session will explore a progression of visible learning that might assist students in transitioning to algebraic reasoning. Be prepared to construct models, draw representations, and use physical models to solve algebraic situations through the lens of a learner.

Breakout Session 5 Friday, 2:10-3:00 PM

F501 Using Crosscutting Concepts to Scaffold Student Thinking

Julie Dahl & Deb Wolf, Sanford Underground Research Facility sanfordlab.org/educators julie.dahl@bhsu.edu

Crosscutting concepts provide students with an organizational framework for connecting knowledge from various disciplines into a coherent and scientifically based view of the world. This session will focus on strategies that utilize Crosscutting Concepts (CCCs) in the classroom to support and deepen student learning.

F502 Kinesthetic Astronomy

Dr. Judy Vondruska, SD State University

Learn how to teach basic astronomical concepts through choreographed bodily movements and positions that provide educational sensory experiences. This session will focus on modeling the astronomical meaning of the day, year, and seasons as well as the nature and timing of moons phases.

F503 Designing and Implementing DGE Tasks That Engage Students in Productive Struggle

Ashley Jairam, University of South Dakota ashley.jairam@usd.edu

Teachers can engage students in productive struggle by designing and implementing tasks that create uncertainty. This session will explore characteristics of dynamic geometry tasks that create uncertainty and engage students in struggle. This session will also explore what teachers can do to help students resolve those uncertainties, making struggle productive.

F504 FEATURED SESSION:

Science Words=Winning Words for Success Kim Soper

Do your students struggle with some basic assessment terms and what they are to do on written assessments? Learn a strategy to connect academic science vocabulary to being successful for the future.

F505 FEATURED SESSION:

What's So Cool About Manufacturing? A Career Exploration ContestDakota BSara Byre, South Dakota Manufacturing and Technology6th-8th STEM

The "What's So Cool About Manufacturing?" contest is designed to expose, educate and excite middle school students about careers in manufacturing. Over the course of a semester, students will take a field trip to a local manufacturer to film, edit and market to their peers why they think manufacturing is cool. Schools will compete against other schools from across the state to create the best two-minute clip answering the question: "What's so cool about manufacturing?" The goal is to promote STEM education and increase regional awareness about different careers in the industry in a fun and engaging way. Schools that participate will receive free filming equipment and accessories.

Justin Lovrien & Lisa Fucello, Brandon Valley High School justin.lovrien@k12.sd.us

Introduce teachers to a summer opportunity, the SD EPSCoR Science Three Dimensional Mini-Unit program. We will introduce two sample lessons, one covering ESS standards on plate tectonics and Earth's early history and another on designing a GMO with a hands-on introduction to gel electrophoresis.

F608 FEATURED SESSION:

Minimizing the "Matthew Effect" Sara VanDerWerf, VanDerWerf Educational Consulting saravanderwerf.com saravdw@gmail.com

The Matthew Effect is a phenomenon sometimes summarized by the adage that "the rich get richer and the poor get poorer." How do we catch-up students in our classes that are not academically ready to be there? How can we help create classrooms where all students are engaged in doing important mathematics?

F609 FEATURED SESSION:

 From Gaps to Growth: Moving Students Towards Multiplicative Automaticity Dakota F

 Mollie Gabrielson & Lucinda (Petey) Maccarty, US Math Recovery Council
 Elementary Math

 mollie@mathrecovery.org
 Elementary Math

Finding a balance between conceptual understanding & automaticity can be challenging! Explore strategy-based approaches that build bridges towards automaticity by prioritizing number relationships to serve as a catalyst for larger values. Intentional tasks & activities will increase the enjoyment of math, as well as mastery of multiplication facts. Together, we will explore trajectories and corresponding strategy-based approaches using a variety of tasks and activities that both increase students enjoyment of mathematics, as well as their fluency with basic facts.

F610 Knowledge of Domains: Inconsistent Applications of Definition to Problem-Solving

Tasks

Dr. Margaret Adams, South Georgia State College sgsc.edu margaret.adams@sgsc.edu

Although functions and domains are among the Grade 8 Common Core Standards, distorted recollections occur in college-level mathematics. Prior function knowledge transfers inconsistently to written problem-solving tasks. Inappropriate schema construction, a theoretical model of understanding, (Richard Skemp, 1987) is proposed to explain misconceptions. Suggestions for instructional practices will be exchanged.

S308 FEATURED SESSION:

Making Student Thinking Visible Sara VanDerWerf, VanDerWerf Educational Consulting

<u>saravanderwerf.com</u> saravdw@gmail.com

Connecting the mathematics we teach in grades six through twelve mathematics with a visual representation is critical for many students to make sense of mathematical concepts. What are the most effective representations to use with secondary students? How do you listen to students and make their thinking visual using these models/representations?

S309 FEATURED SESSION:

Fractions: The Struggle is Real

Mollie Gabrielson, US Math Recovery Council mollie@mathrecovery.org

Fractions are the foundation for a series of important secondary math concepts, yet the struggle with teaching fractions is real! Participants will engage in rigorous tasks designed to elicit sense making related to fraction concepts as learners first and then observe students engaging in the same tasks. It's time to put the fear of fractions away! The ways students build and work with units in whole number contexts influences the way they coordinate units in fraction contexts. Participants will explore how to negate these whole number misconceptions by engaging in rigorous tasks that will develop strong mental actions of whole numbers and move students on the pathway towards success with fractional units!

S310 Tech Toys in the Classroom

Mark Iverson, Watertown School District mark.a.iverson@k12.sd.us

Try 3D printing, laser engraving, flying a drone or coding a robot for yourself! You'll see how FUN it is while learning so much at the same time. If you don't already have a 3D printer or laser engraver or any tech toys in your classroom, this is great opportunity to learn how to expand your STE(A)M, CTE, FabLab or MakerSpace programs. If you're already a pro, visit to share your experiences with other educators!

Saturday, 10:50-11:30 AM

Final Networking, Exhibitor, and Poster Session

Conference attendees have the opportunity to network and visit with Exhibitors and enter door prize drawings. Exhibitors have color coded tickets for drawings. These tickets will be given out in the exhibition hallway at the discretion of the exhibitors. Keep one half and place the other in the drawing buckets at the registration table. The more booths you visit, the better your chances to win a prize! Drawings for this session will be held during Saturday lunch and you must be present to win!

K-12 Science

S501 Science Demos: Bernoulli's Principle Prairie A

Steven Rokusek, South Dakota Public Broadcasting sdpb.org/learn steven.rokusek@state.sd.us

During this session participants will review classic science demonstrations and activities that highlight Bernoulli's Principle. Many of the demonstrations are accompanied by videos and lessons. This will be an educational and entertaining session.

S502 Sustainability Development Goals and Fulbright Julie Olson, Mitchell Senior High/ K-12 STEM Second Chance HS (alternative school)

julie.olson@k12.sd.us

Learn how the sustainability development goals and Fulbright come together to make classroom instruction more meaningful. Also learn about how to apply for a trip to Japan!

Prairie B

S503 National Geographic Certified Educator

Anne Lewis, South Dakota Discovery Center sd-discovery.org annelewis@sd-discovery.org

National Geographic Educator Certification is a free professional development program that recognizes pre-K through 12 formal and informal educators committed to inspiring the next generation of explorers, conservationists, and changemakers. These educators are part of a powerful movement to make the world a better place by empowering students.

S504 FEATURED SESSION:

Workforce Initiatives to Meet Modern Manufacturing Demand

Sara Byre, South Dakota Manufacturing and Technology

With the nation's aging workforce and low unemployment rate, employers are looking for innovative ways to recruit the next generation of skilled workers. Join this discussion on the ways South Dakota is actively working to meet the growing demand of skilled trade workers as well as tactics other states are using to change young Americans' perceptions about modern manufacturing.

S508 FEATURED SESSION:

Professional Development in Mathematics: Making it Count!

Mollie Gabrielson, US Math Recovery Council mollie@mathrecovery.org

Dakota E Elementary Math

Investigate the shift in mathematics instruction to an increased focus on conceptual understanding and problem solving. Examine guiding principles to inform mathematics instruction. Provide ways to support teachers in moving their instructional practice forward in a meaningful way that includes support systems and follow up strategies to ensure deeper learning and sustained implementation. Examine how developmental mathematics begins with the child, not with the mathematics and focus on increased educator effectiveness.

Believing that students should work in teams in math classrooms and getting them to work effectively are two different things. Come learn strategies that you can use in your classroom to help teams of students value one another and sincerely work together to solve problems! We will look at the why, when, how and what's of using teams along with specific strategies such as team roles, think-ink-pair-share, swap meet, and reciprocal teaching.

Breakout Session 6 Saturday, 2:40-3:30 PM

S602 Ethics & Genetics

Liz McMillan, Sanford PROMISE Sanford Research Robin Bowman, Personal Genetics Education Project sanfordresearch.org/education pged.org SanfordOutreach@sanfordhealth.org

Next Generation Sequencing, Direct To Consumer Genetic testing and ancestry services, CRISPR, and gene editing are just a few of the areas of genetics that may include ethical decision making in 2019 and beyond. pgEd creates lessons and resources for teachers to introduce ethical discussions in their classrooms. Learn about these lessons and other ways to engage in this NIH SEPA project.

Prairie B 9th-12th Science+

Saturday, 2:40-3:30 PM

S603 STEM Education through Renewable Energy,

The KidWind Challange

Chad Ronish, Hill City High School Steve Wegman, South Dakota Renewable Association kidwindchallenge.org chad.ronish@k12.sd.us

The KidWind Challenge provides a great platform for your students to access STEM education by participating in the challenge, or implementing activities into your classroom. Students can explore the issues of energy conservation and energy transformation in fun hands on engineering contests!

S604 Aquaponics-Fish to Food	Dakota A
Brian Schmuck, Menno Public School	K-12 Science
brian.schmuck@k12.sd.us	

Vegetables and herbs can be grown indoors, all year long. Using PVC piping, tubes, totes, fish and plants, you can create an indoor garden without using fertilizers. Participants will be shown a model of a working aquaponics unit. Discussions will show how the units can be used in K-12.

S605 Demos to Spark Students' Interest	Dakota B
Larry Browning, Physics Department, South Dakota State University	9th-12th Science
Matt Miller, Chemistry/Biochemistry, South Dakota State University	
Larry.Browning@sdstate.edu	

We've been working on new demonstrations to engage students in the STEM process and we want to share them with you. Hopefully, the carpet will survive this year.

S606 Cybersecurity Education: Whose Responsibility Is It?	Dakota C
Rob Honomichl, Dakota State University	K-12 & Admin STEM
rob.honomichl@dsu.edu	

Your personal information is extremely valuable to cybercriminals. It is important that every student is exposed to cybersecurity education. During this session we will look how cybercriminals exploit individuals as well as provide teaching resources to help students understand computer and cyber sciences.

S608 New South Dakota Math Standards Unpacked	Dakota E
Melissa Walther, McLaughlin School District	K-12 Math
melissa.walther@k12.sd.us	

I will be presenting the new South Dakota math standards in unpacked form. I will show where to find them (I will provide a link to a shared google drive folder if they have not been shared by the state at the time of presentation) and how to use them. I will be explaining the clusters since this is different than the last unpacking.

Prairie C K-12 Math & Science

S609 Trig in Context:

A Civil Engineering Perspective *Dakota F* Fenecia Foster & Beth Kassing,

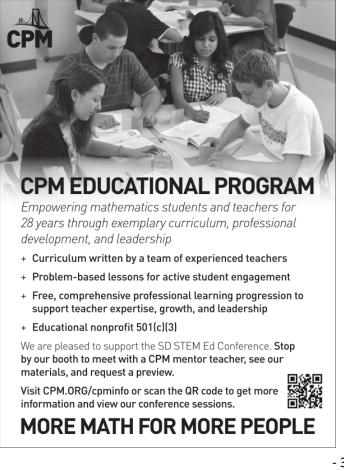

Southeast Technical Institute 6th-12th Math fenecia.foster@southeasttech.edu

Are you looking for authentic trigonometry applications? In this session participants will work through a handful of civil engineering trigonometry applications that will be presented in a way that you can immediately use them in your classroom. Specific topics include surveying, statics, and wastewater.

Jeremy Haugen, EmBE FIRST LEGO League embe.org/program/first-lego-league Dakota G K-12 STEM jhaugen@embe.org

FIRST celebrates 30 years of motivating youth to explore science, engineering and math through project-based learning packed with 21st Century skills. Come find out about the four FIRST programs, their track-record of success, and discuss ideas for implementing them in classrooms and after-school programs.

STEM Educators, help your students:

Find their path. Own their future.

Contact us at 605-367-6040 or admissions@southeasttech.edu to learn about STEM Exploration Events, group campus visits or STEM presentations at your school.

Representatives will be exhibiting on Friday from 8:00 AM until 5:30 PM.

(Most will be available on Saturday till noon.)	These include:		
Army Educational Outreach Program (AEOP)	Marcia Akeung (eCybermission)		
Black Hills State University	Deann Kertzman & Julie Dahl		
CPM Educational Program	Julie Jackson & Bob Petersen		
Houghton Mifflin Harcourt	rt Billy Pugliese & Matt Misialek		
Project Lead The Way	Kathy Van Kley & Vic Dreier		
Sanford fit	Amy Baete & Shelby Braun		
SimplyFun	Stephanie Folk		
South Dakota Discovery Center	Anne Lewis		
SD Envirothon	Kim Smeenk		
South Dakota Public Broadcasting	Steven Rokusek		
South Dakota School of Mines	Ashli Maddox		
Southeast Technical Institute	Fenecia Foster & Elizabeth Kassing		
Steckelberg Consulting	Marie Steckelberg		
STEMscopes	Valerie Shearer		
The Sanford PROMISE: Sanford Research	Liz McMillan & Benjamin Benson		
Washington Pavilion	Lynne Jones		

*Name Tag Lanyards are compliments of Sanford

THANK YOU NASCO and Carolina Biological for donating gift certificates for the conference.

South Dakota Science Teachers' Association Business Meeting will be held in Dakota G at 4:30 pm on Friday, February 8, 2019

SD Council of Teachers of Mathematics Business Meeting will be held in Dakota C at 4:30 pm on Friday, February 8, 2019

Graduate Credit

Conference credit will be offered through Dakota Wesleyan University. You may register for one hour of credit at the 499 or 599 level. Attendance at a sharing session is required to earn graduate credit from Dakota Wesleyan University. There will be personnel available to register you for the credit on Thursday night from 7:00 to 9:00 pm, and on Friday morning from 7:30 to 8:30 am. Check in the hotel lobby for the DWU table. A syllabus listing course requirements will be available at the time of registration. For more information, contact Dr. Ashey Digmann at (605) 995-2625.

Next year's conference will be February 6, 7, & 8, 2020

The 2019 Conference Committee would like to offer a Special Thanks to ...

Dakota Weslyan University and Dr. Ashey Digmann for handling the credit.

All speakers for their dedication to the future of mathematics and science education.

All exhibitors for their enthusiastic participation.

The Huron Area Chamber of Commerce, The Huron Convention and Visitors Bureau for a great deal of help and cooperation.

The Huron Events Center & Crossroads Hotel for their help and generous hospitality.

All the conference participants who make all of our efforts worthwhile and without whom there would be no conference.

A SPECIAL THANKS GOES TO **TIE** FOR HELPING US WITH PROJECTORS!

(This year's TIE Conference is April 7-9, 2019 in Rapid City.)

Next year's conference will be February 6, 7, & 8, 2020.

The 2019 Spring STEM Ed Conference is a joint venture of the South Dakota Science Teachers' Association (SDSTA) and the South Dakota Council of Teachers of Mathematics (SDCTM)

Note: There is a common registration form for the conferences. One form is used to register for all activities, including SDSTA and SDCTM memberships.

ONE-day (SDCTM or SDSTA members)	\$55	Non-members	\$105	Students \$15
includes the Noon Luncheon for that day				
TWO-day (SDCTM or SDSTA members)	\$80	Non-members	\$130	Students \$25
includes the Noon Luncheon for both days	5			

The Friday Night Banquet is **NOT** included in the registration fee. A ticket for the banquet may be obtained at an additional cost of **\$25**. {Registration after Jan. 20 will be considered as on-site and will cost an additional \$35}

Because of a limited printing budget, the program was available in advance at the SDCTM website [www.sdctm.org] or SDSTA web site [www.sdsta.org]. Printed programs were not mailed, but were distributed on site with the registration materials.

2019 Mathematics and Science Conference SDSTA & SDCTM

Please take time to respond to the following questions concerning the conference. This information will help the program committee take steps to improve future conferences. Circle one in each group:

Content Area: Grade Band:	Math Elementary	Science Middle School	Both High School
Did you prefe	r this year's printed format of	or last year's two column forma	t? {Circle one} This year - Last year
		joyed; or X those we could do Afternoon: popcorn; All day	

What presentation or presentations did you feel were the most useful or helpful?

What made it (or them) good?

Were there any presentations that disappointed you?

Please give us your overall assessment of the conference along with any comments you would like to share.

Detach and fill in the following for a final prize to be sent after the conference. To register for the prize, turn in this entry along with your evaluation form.
