Updated 12-26-2025

Banquet Speaker - RunningHorse Livingston is the founder and CEO of Mathematize Inc., an organization dedicated to expanding high-quality educational opportunities for STEM learning communities and organizations. A citizen of the Bad River Band of Lake Superior Chippewa, he is a nationally recognized educator and instructional coach with more than two decades of experience supporting schools across the country. RunningHorse's work focuses on promoting mathematics understanding, engineering design thinking, and place-based STEM learning that honors Indigenous knowledge systems and promotes student identity and agency. RunningHorse

specializes in experiential professional learning, guiding teachers and educators by demonstrating models of student-centered instruction. He partners with schools and organizations to co-design and facilitate local, place-based STEM learning experiences that empower teachers to lead classrooms where every student can thrive.

Other Featured Speakers

Linda Stegemann is passionate about helping educators establish systems in their classrooms that not only support student learning but also promote healthy work-life balances for teachers. After spending a decade in the classroom as a chemistry and physics teacher, she found her niche in supporting the science education community with EdTech solutions made by the community, for the community. She's now a member of the PhET Interactive Simulations team, supporting schools and organizations as they incorporate the sims into their education services. Linda has a BA in Chemistry from the University of West Florida and an MS in Chemistry from South Dakota State University. When she's not working, you can find her playing Magic: The Gathering with her three kids or looking for an awesome new restaurant to try!

John Golden Professor of Mathematics GVSU, was lucky to become a math teacher educator. He's spent almost 30 years working with future teachers, inservice teachers and K-12 learners. He spends way too much time thinking about math and games and math and art. He and his son Xavier, an art teacher, have a fantasy math graphic novel soon to be published.

Katy Dornbos believes that people thrive when great things are expected of them, and she loves to support both students and teachers as they grow. Katy teaches chemistry, STEM, dual-credit chemistry, and serves as science department chair at Norris High School just south of Lincoln, NE. She is a 2021 recipient of the PAEMST (Presidential Award for Excellence in Science and Math Teaching). Katy leads teachers with a highly interactive style, leveraging their experience, hopes, and questions. She enjoys leading professional development at the district, state, and national levels. She loves finding ways for her students to improve their communities through science, whether through designing (and raising \$11,000 for!) outdoor learning spaces on campus, testing private wells for contaminants, or hosting science days for elementary school students. Some of Katy's favorites in STEM education: POGIL, Johnstone's Triangle, and labs with many trials.

2026 SD STEM Ed Conference

Presenter Materials

????

Thursday 7:00 - 9:00 PM - Conference Kick Off

Thursday, 7:00 PM

Science Showcase

Prairie B

SDSTA President Alison Bowers and other officers

Bring an activity to share with colleagues that relates to your science classroom. Share your lesson by bringing copies to share or a link (or send an email to officers@SDSTA.org to post to their web). Pizza will be provided for those who attend!

Thursday, 7:00 PM

Math Potluck

Prairie C

SDCTM President Sharon Vestal and other officers

Network with other math teachers! Share your favorite activities and lessons! Swap teaching ideas! Sharing math teaching ideas will be the focus of this session. Bring 25 copies of your favorite activity to share. Leave with ideas from other great teachers. Pizza will be provided for those who attend!

Share the Classroom Treasures (free items)

Check the hall between the Salons and Prairie B & C

Available now till Saturday 2:40 PM

- Friday 7:00 AM -

Conference Onsite Registration Opens - Crossroads Lobby

- Friday 8:00 AM - Conference Overview -

Friday, 8:00 AM

Prairie A - B - C

SDCTM President Sharon Vestal and SDSTA President Alison Bowers

Opening Session - Conference Welcome for All

Pre-Service, Elementary, Middle School, High School, College

Math, Science, STEM

Featured Speakers & others will give you a Conference overview. Conference layout, credit options and many other items will be discussed. Any questions?

At 4:30, both SDSTA and SDCTM will have their annual business meetings. Every member is invited to attend. This is an election year for SDSTA. SDSTA will be meeting in Dakota A and SDCTM will be meeting in Dakota B. The Social Hour begins as the meetings end. The Banquet begins at 6:30.

- Friday 8:30 AM -

Friday, 8:30 AM

Dakota A

Anne Lewis, Dr. Chris Anderson, Megan Howard, Kristie Maher South Dakota Discovery Center

Teaching Science through...Chameleon Tongues?

annelewis@sd-discovery.org christopher.V.Anders@usd.edu; megan.m.howard@northern.edu;

kristie.maher@k12.sd.us Middle School, High School Science

What happens when you pair a researcher with teachers? Find out in this session. USD professor Chris Anderson and teachers explored how research on, yes, chameleon tongues can be used to teach science. Learn a fun, hands-on activity and hear from a classroom teacher about how understanding how research works impacted her approach to teaching.

Friday, 8:30 AM

Dakota B

Kristine Heinen South Dakota Discovery Center

360° Big Screen Adventures!

kristineheinen@sd-discovery.org Elementary, Middle School, High School

Science, STEM

Gather round our planetarium, journey to the unknown! With limitless possibilities, this session gives you a taste of the SD Discovery Center's traveling dome. Ancient SD seas to the ends of the universe—start an unforgettable adventure and learn how to bring our Journey Beyond the Known Planetarium to your students.

Friday, 8:30 AM

Dakota C

Dr. Ryan Schrenk Montana Digital Academy

Scale, Support, Succeed: Mastering Math Transitions with EdReady Classroom

ryan@mtda.org Middle School, High School, College

Math

Get results! Master math transitions! Learn how we prepare students for middle/high school algebra and college math using Montana's proven EdReady Classroom model. With 12 years of experience and 25,000+ enrollments in 2024, our proficiency-based online program and expert support ensure students are ready for their next step.

Friday, 8:30 AM

Dakota D

Beverly DeVore-Wedding, Ph.D.

NSTA

From Typhoid Mary to COVID-19: Pursuing an Understanding of Disease Transmission and Tracking through Integrative STEM

bdevorewedding@gmail.com

All Grade Levels

STEM

In this presentation, we will investigate ways to incorporate STEM topics into the hunt for disease. Case studies to MICRO:BITs help engage students in tracking the transmission of disease. Takeaways include 1. Integrate discipline-specific literacy case studies and technology as strategies for engaging students in problem-solving around a current topic; 2. Construct opportunities to engage in the SEPs around content as they determine who is patient zero; and 3. Demonstrate how integrative STEM uses exploration and sensemaking to come together to help solve a world pandemic.

Friday, 8:30 AM

Dakota E

Betsy Schamber Dakota State University

Making Moon Craters: Inquiry into the Science and Engineering Practices

betsy.schamber@dsu.edu

Elementary, Middle School

Science

In this interactive session, participants will investigate moon craters through a hands-on inquiry project that embeds the Science and Engineering Practices from the Next Generation Science Standards. Using inquiry to explore each practice, participants will experience strategies that spark curiosity, encourage critical thinking, and deepen student-centered science learning.

Friday, 8:30 AM

Dakota F

Raegan Kleinpeter South Dakota Discovery Center

Robotics in the Classroom

raegankleinpeter@sd-discovery.org Elementary, Middle School, High School Science, Math, STEM

Wondering how to bring robots into your classroom? No more! Explore multiple robots and different ways to include them in your existing cross-curricular lessons. From grab-and-go robots to more complex code engineering, you do not have to be an expert to spark your students' robotic curiosity!

Friday, 8:30 AM

Dakota G

Matt Miller South Dakota State University

Utilizing Green Chemistry to Illustrate Science Concepts

Matt.Miller@sdstate.edu

Middle School, High School

Science, STEM

Green chemistry is the concept that we should be careful about what we use so as not to cause additional contamination from the products of our chemical activities. Various examples of green chemistry activities will be used in a hands-on workshop to illustrate green chemical principles.

Friday, 8:30 AM

Dakota H

Louisa Otto, Benjamin Benson Sanford Research

Bringing Biomedical Research to the Classroom

louisa.otto@sanfordhealth.org benjamin.benson@sanfordhealth.org

Elementary, Middle School, High School, College

Science, STEM

Sanford PROMISE, the outreach arm of Sanford Research, connects educators with current biomedical science. This session highlights recent research advances and shares classroom-ready resources to engage students in authentic inquiry. Participants are encouraged to provide feedback on how Sanford PROMISE can further support science teaching and learning.

- Friday 9:30 AM -

Friday, 9:30 AM

Prairie A

Katy Dornbos **Featured Speaker**

More Feedback, Less Grading

kldornbos@gmail.com

Elementary, Middle School, High School, College

Science, Math, STEM

Feedback is crucial to learning, and grading can be an obstacle to quick feedback. I will share small changes that increase feedback to students without requiring more time/energy from the teacher.

Friday, 9:30 AM

Prairie B

John Golden

Featured Speaker

Grand Valley State University

Listen

goldenj@gvsu.edu

Elementary, Middle School, High School

Math

Eliciting learner thinking is a core teaching practice. We'll consider how to improve our questioning and investigate other opportunities to hear how learners are thinking and what their ideas are about important concepts and processes.

Friday, 9:30 AM

Prairie C

RunningHorse Livingston

Featured Speaker

CEO of *Mathematize Inc.*

Bringing STEM Inquiry to Life in the Elementary Classroom

mathematize@outlook.com

Math

This workshop introduces engaging, age-appropriate engineering challenges that support problem-solving skills and STEM confidence in students. Teachers will work in groups to plan, build, test, and refine simple designs using low-cost materials. We'll break down the engineering design cycle for early grades and discuss how to encourage productive struggle and reflection. We'll explore how to guide students to ask questions, test ideas, and communicate their reasoning. Participants will leave with classroom-ready challenge prompts and facilitation strategies to inspire young engineers of all abilities.

Friday, 9:30 AM

Dakota A

Branden Hoefert

University of South Dakota

From Play to Programming: Computational Thinking with Robots in the Elementary Classroom

branden.hoefert@usd.edu

Elementary

STEM

Integrating robotics into elementary classrooms fosters computational thinking and problem-solving skills. In this interactive session, participants will explore hands-on activities with Sphero Indi robots to see how young learners can develop foundational coding and problem-solving abilities while integrating robotics across the curriculum. No prior coding experience is required!

Friday, 9:30 AM

Dakota B

Linda Stegemann

Featured Speaker

PhET Interactive Simulations

Meet PhET Studio: Interact Your Way

linda.stegemann@colorado.edu

Elementary, Middle School, High School, College

Science, Math, STEM

Be empowered with PhET Studio, PhET's first customization tool for teachers! Learn how to create unique sim experiences that fit your lessons and inspire students like never before. Join us to see Studio in action and start a free trial. Don't miss this exclusive opportunity!

Visit with Conference Exhibitors to be
qualified to win valuable prizes at the noon meals
and throughout the days.

Friday, 9:30 AM

Dakota C

Major Jonathan Becker

South Dakota Wing Civil Air Patrol

Free STEM Resources from the Civil Air Patrol

jon.becker@sdwg.cap.gov

Elementary, Middle School, High School

Science, Math, STEM

Civil Air Patrol (CAP) educates about the important role aviation, space, cyber, and STEM play in America's future. Learn about joining CAP as an Aerospace Education Member (AEM) to enjoy free aerospace/STEM educational resources and opportunities, including STEM Kits, standards-based K-12 curriculum materials, and teacher orientation flights.

Friday, 9:30 AM

Dakota D

Laura Bain

CPM Educational Program

When Math Gets Tough: Helping Students Thrive Through Productive Struggle

laurabain@cpm.org

Middle School, High School

Math

How can we help middle and high school students approach math challenges with confidence and curiosity? This session explores ways to make struggle productive by fostering understanding, agency, and positive math identities. Learn practical strategies for building community, planning purposeful challenges, and guiding students to embrace meaningful mathematical struggle.

Friday, 9:30 AM

Dakota F

Katrina Donovan

South Dakota Mines

Ceramic & Glass Industry Science Kits

katrina.donovan@sdsmt.edu

Elementary, Middle School, High School, College

Science, STEM

Seven hands-on modules for attendees to experience. The attendees will learn about Glass Fibers, Magic Color Beads and UV Light, Silly Putty Science, Shape Memory Alloy, Fiber Optics, Heated Aluminum Nails, and Fluorescence. Attendees will walk out with their very own mini materials kit (\$49 value for free!)

Friday, 9:30 AM

Dakota G

Colin Marsh

SDCTM

Conversations on Building Thinking Classrooms: What's Working & What's Hard

marshcolin180@gmail.com

Elementary, Middle School, High School, College

Science, Math

Come discuss the challenges and benefits of using Building Thinking Classrooms practices in your math classroom. This is an opportunity for both experienced educators and educators interested in using BTC to have conversations. I will provide a platform to discuss common questions regarding BTC.

South Dakota

MANUFACTURING
& TECHNOLOGY
SOLUTIONS

Friday, 9:30 AM

Dakota H

Ben Benson, Louisa Otto

Sanford Research

Artificial Intelligence in the Biomedical Research Lab

Benjamin.benson@sanfordhealth.org Louisa.Otto@SanfordHealth.org

Middle School, High School, College

Science, Math, STEM

This session builds AI literacy by exploring how computer science intersects with biology and biomedical research. Participants will examine AI's strengths, pitfalls, and potential harms, practice strategies for responsible use, and engage with hands-on tools. Reflection activities highlight ethical impacts while fostering cross-disciplinary connections for teaching and research.

Friday, 9:30 AM

Symposium

Mark Iverson & Brooks Jacobsen

Lake Area Technical College

Building South Dakota's STEM Teaching & Learning Community

mark.iverson@lakeareatech.edu Brooks.jacobsen@lakeareatech.edu Middle & High School, College STEM

Discover how Lake Area Technical College's NSF-ATE project is building a statewide Teaching & Learning Resource Community to connect and empower South Dakota's STEM and technical educators. Participants will gain access to classroom-ready resources, upcoming PD opportunities, and direct industry connections supporting hands-on, high-impact STEM teaching.

Friday, 9:30 AM

Salon

Sandra Shipley

Bison School

Algae Academy - A Free Resource for Hands-on Science

Sandra.Shipley@k12.sd.us

Elementary & Middle School

Science, STEM

Algae Academy is a great free and scripted resource to learn about algae and the many applications in our world today. It is easy to teach and fun to grow algae in the classroom.

- Friday 10:30 AM -

Friday, 10:30 AM

Prairie A

Katy Dornbos

Featured Speaker

The Beauty & Fun of Graphs

kldornbos@gmail.com

High School, College

Science

Data, graphs, maps - they're wonderful, full of information, and fun to create. Participants will engage in two activities that get students thinking about data, wondering about how it's collected, and building a graph with real time data. Note: part of the session is chemistry specific.

Friday, 10:30 AM

Prairie B

John Golden

Featured Speaker

Grand Valley State University

Play

goldenj@gvsu.edu

Elementary

Math

Play is at the heart of what it means to do math. We'll look at opportunities for - and try! - playful mathematics with small shifts, focused activities and actual games.

Friday, 10:30 AM

Prairie C

RunningHorse Livingston

Featured Speaker

CEO of *Mathematize Inc.*

STEM Outdoors: Exploring Environmental Science and Engineering

mathematize@outlook.com

Math

Discover simple, hands-on ways to connect STEM learning to the natural world right outside your classroom. In this session, participants will model investigations that use environmental restoration practices infused with Tribal Ecological Knowledge to tackle STEM challenges. We'll identify opportunities to integrate observation, measurement, data collection, and environmental stewardship while supporting curiosity and joyful learning. Teachers will learn how to honor diverse ways of knowing, engage students' identities, and connect learning to their real lives.

Friday, 10:30 AM

Dakota A

Leanne Holdorf

Sioux Falls Lutheran School

This Session is Under Lock and Key!

lholdorf@sflutheranschool.com

Middle School, High School, College

Science, Math, STEM

See in real time how breakout boxes can create memorable learning experiences for students. Build your own template to fit your classroom resources, including using Google Forms for a digital version.

Friday, 10:30 AM

Dakota B

Linda Stegemann

Featured Speaker

Take "OAIM" and Fire!: Inquiry Procedure Writing for Science Classes

linda.stegemann@colorado.edu

Middle School, High School,

College Science

We all teach our students to write lab procedures, but how many of us teach these students how to truly "write" a procedure? In today's session, participants will be introduced to the OAIM {Object, Action, Instrument, Measurement} procedure heuristic and learn how to use this simple, four-part acronym to give specific feedback on what your procedures are missing.

Friday, 10:30 AM

Dakota E

Jeff Schneider

Estelline High School

AI for Every Classroom: Real-World Skills & Student Agency Through the Design Thinking {beginning AI users}

Jeff.Schneider@k12.sd.us

All Levels

Science, STEM

Every teacher—regardless of subject or AI experience—can use Design Thinking to bring practical AI into the classroom. Explore hands-on strategies, prompt-writing, and reflection techniques that help learners build agency, critical thinking, and “learning how to learn” skills essential for thriving in a fast-changing, technology-driven world.

UNIVERSITY OF
SOUTH DAKOTA
SCHOOL OF EDUCATION

Friday, 10:30 AM

Katrina Donovan, Matthew Whitehead

South Dakota Mines

Art + Engineering - Drawing with a STEAM Purpose

katrina.donovan@sdsmt.edu matthew.whitehead@sdsmt.edu

Elementary, Middle School, High School, College

Science, Math, STEM

Drawing is often thought of as an art—and while it certainly is, it's also a powerful tool for scientists, mathematicians, and engineers. From Leonardo da Vinci's notebooks to modern design labs, drawing helps us visualize ideas, sketch out inventions, and explore complex three-dimensional forms, like the structure of a crystal. Come learn how to draw in three dimensions with us.

Friday, 10:30 AM

Symposium

Neal Connors, Ph.D. Chief Scientific Officer/Kyle Larson

Dakota Bioworx, Brookings, SD

Biotech opportunities/ BCSI mini credentials

neal@dakotabioworx.org/kyle@dakotabioworx.org

High School, College

STEM

Presentation on Biotech-workforce development and presentation on use of BCSI mini credentials. Dakota BioWorx is made possible by the visionary support of the Bio Leadership Coalition: SDSU, SDS Mines, POET, SD Corn Growers, SD Soybean Checkoff, the Research Park of SDSU, and South Dakota Biotech.

Friday, 10:30 AM

Salon

Dr. Jessica Vogel

SDSBVI Superintendent & Sp Ed Director

STEM Without Limits: Engaging Students of All Abilities

Jessica.Vogel@sdsbvi.northern.edu

K-12

STEM

STEM learning should inspire curiosity, creativity, and confidence in every student, regardless of ability. This session explores practical strategies and innovative approaches to make Science, Technology, Engineering, and Mathematics accessible and meaningful for learners with diverse needs. Participants will discover how to adapt STEM lessons through multisensory instruction, assistive technology, tactile materials, and collaborative learning models.

- Friday 11:20 AM - 1:10 PM -

Friday, 11:20 AM

Networking and Visit with the Exhibitors

Exhibitor Hallway

Conference attendees have the opportunity to network with each other and visit with Exhibitors and enter door prize drawings. Exhibitors have color coded tickets for drawings. These tickets will be given out in the exhibition hallway at the discretion of the exhibitors. Keep one half and place the other in the drawing buckets at the registration table. The more booths you visit, the better your chances to win a prize! Drawings for this session will be held during Friday lunch and you must be present to win.

Friday 11:50 AM-12:50 PM

- LUNCH -

Dakota C & D

Come for a meal, awards, recognitions, and raffle with swag from vendors and other amazing organizations! Hosted by the Presidents of SDCTM & SDSTA. Awards to be presented include Outstanding Biology Teacher, Outstanding Mathematics Teacher, Outstanding Physical Science Teacher, Outstanding Earth & Space Science Teacher, Outstanding Elementary STEM Teacher, Daniel Swets Robotics Materials Award and Kelly Lane Earth & Space Science Grants.

CPM Educational Program is the student-centered solution for research-based math curriculum and professional learning that helps teachers create engaging classrooms where students truly understand mathematics.

Empowering Students. **Supporting Teachers.**

With thoughtful tech connections that help bring focus and intention into the classroom, CPM equips educators with the tools, strategies, and support to build confidence and foster lasting success in math.

Discover Resources and Samples at **CPM.org**

Friday 12:50-1:10 PM

Networking and Visit with the Exhibitors

Exhibitor Hallway

Conference attendees have the opportunity to network and visit with Exhibitors and enter door prize drawings. Exhibitors have color coded tickets for drawings. These tickets will be given out in the exhibition hallway at the discretion of the exhibitors. Keep one half and place the other in the drawing buckets at the registration table. The more booths you visit, the better your chances to win a prize! Drawings for this session will be held during the social hour and you must be present to win. Drawings will be posted around the Registration Table & winners may claim before they go to the Banquet.

Discussion of Proposed SD K – 12 Math Standards

sharon.vestal@sdstate.edu

Elementary, Middle School, High School, College

Math

Come join SDCTM board members for a review and discussion of the recently proposed K – 12 Math Standards from the South Dakota Department of Education. Attendees will be split into grade band tables: K – 2, 3 – 5, 6 – 8, and 9 – 12 to review the standards and share feedback. Whether this is your first time reviewing the standards or you've already submitted feedback to the state, your perspective is valuable. Together, we will explore how SDCTM can support teachers if the proposed standards are adopted.

STEM With Meaning: Biomimicry Innovation in the Classroom

mathematize@outlook.com

Math

This hands-on session provide ideas for high school teachers to incorporate biomimicry into STEM learning. The practice of learning from natural systems, designs, and relationships to solve human challenges is becoming popular. This session will emphasize culturally rooted understandings of humans' relationship to the environment. Participants will engage in model activities where students analyze how plants, animals, and ecosystems solve problems such as water filtration, fish species revitalization, and structural innovation. We will also explore examples of Indigenous ecological knowledge and how many Tribal communities have long designed technologies based on reciprocal relationships with the land.

Calvary Christian School, Rapid City

Computational Thinking with and without Computer Science

sm0keybearsd@gmail.com

Elementary, Middle School

Science, Math, STEM

A basic introduction to Computational Thinking (CT), examples of plugged and unplugged activities to teach CT, and a hands-on entry-level Computer Science (CS) activity that utilizes CT pillars and at least one example to help students create CS models using CT skills using Code.org and Scratch.

Estelline High School

AI for Every Classroom: Real-World Skills & Student Agency Through the Design Thinking {previous AI users}

Jeff.Schneider@k12.sd.us

Elem, Middle School, High School, College

Science, STEM

Every teacher—regardless of subject or AI experience—can use Design Thinking to bring practical AI into the classroom. Explore hands-on strategies, prompt-writing, and reflection techniques that help learners build agency, critical thinking, and “learning how to learn” skills essential for thriving in a fast-changing, technology-driven world.

STEM With Meaning: Biomimicry Innovation in the Classroom

mathematize@outlook.com

Math

This hands-on session provides ideas for high school teachers to incorporate biomimicry into STEM learning. The practice of learning from natural systems, designs, and relationships to solve human challenges is becoming popular. This session will emphasize culturally rooted understandings of humans' relationship to the environment. Participants will engage in model activities where students analyze how plants, animals, and ecosystems solve problems such as water filtration, fish species revitalization, and structural innovation. We will also explore examples of Indigenous ecological knowledge and how many Tribal communities have long designed technologies based on reciprocal relationships with the land.

Saturday, 1:40 PM

Kristine Heinen

South Dakota Discovery Center

360° Big Screen Adventures!

kristineheinen@sd-discovery.org

Elementary, Middle School, High School

Science, STEM

Gather round our planetarium, journey to the unknown! With limitless possibilities, this session gives you a taste of the SD Discovery Center's traveling dome. Ancient SD seas to the ends of the universe—start an unforgettable adventure and learn how to bring our Journey Beyond the Known Planetarium to your students.

Saturday, 1:40 PM

Dakota E

Ben Benson & Louisa Otto

Sanford Research

Artificial Intelligence in the Biomedical Research Lab

Benjamin.benson@sanfordhealth.org *Louisa.Otto@SanfordHealth.org*

Middle School, High School, College

Science, Math, STEM

This session builds AI literacy by exploring how computer science intersects with biology and biomedical research. Participants will examine AI's strengths, pitfalls, and potential harms, practice strategies for responsible use, and engage with hands-on tools. Reflection activities highlight ethical impacts while fostering cross-disciplinary connections for teaching and research.

Saturday, 1:40 PM

Dakota F

John Williams University of South Dakota

Radiation Shielding: A Hands-On Middle School Engineering Activity for Those Who Like to Build

john.williams@usd.edu

Elementary, Middle School, High School

Science, STEM

In this model lesson, first written by SURF and expanded by USD preservice teachers, students tackle the problem of protecting a sensitive instrument from radiation. While the real-life scenario concerns many types of radiation, the student version focuses on eliminating all visible light. (Lesson plans / digital materials will be provided)

Saturday, 1:40 PM

Dakota G

Laura Shumaker Technology Teacher Howard School District

Edison Robots

Laura.shumaker@k12.sd.us

Elementary, Middle School, High School

STEM

Explore how Edison robots can transform STEM learning in your classroom! This session introduces hands-on activities, coding challenges, and real-world problem-solving using Edison robots. Learn how to engage middle and high school students in robotics, programming, and engineering through accessible, affordable, and curriculum-aligned technology.

Saturday, 1:40 PM

Sharon Vestal, Susan Gilkerson, Amy Schander, & other SDCTM Board members SDCTM President

Discussion of Proposed SD K – 12 Math Standards

sharon.vestal@sdstate.edu susan.gilkerson@k12.sd.us; amy.schander@k12.sd.us

Elementary, Middle School, High School, College

Math

Come join SDCTM board members for a review and discussion of the recently proposed K – 12 Math Standards from the South Dakota Department of Education. Attendees will be split into grade band tables: K – 2, 3 – 5, 6 – 8, and 9 – 12 to review the standards and share feedback. Whether this is your first time reviewing the standards or you've already submitted feedback to the state, your perspective is valuable. Together, we will explore how SDCTM can support teachers if the proposed standards are adopted.

Saturday, 2:40 PM

Dakota C

Matt Miller & Larry Browning

South Dakota State University

More Demonstrations

matt.miller@sdstate.edu larry.browning@sdstate.edu

Elementary, Middle School, High School

Science, STEM

There is an outside chance that Larry Browning will be back in February. If not, we will have fun doing chemistry demonstrations!!!!!! New science demonstrations which connect to typical science content will be presented.

Wrap-Up & Reflection Discussions - Saturday 3:35-4:00 PM

University of South Dakota	Dan Mourlam, Branden Hoefert

Graduate Credit will be offered through Black Hills State University. You may register for one-hour of credit at the 692. Attendance at 15 hours worth of sessions, lunches, and/or the banquet are required to earn graduate credit from BHSU along with assignments listed in the syllabus. Credit registration information is online at the following link: <https://sites.google.com/view/ed-694-sdstemed-credit2026/home> Make sure to register for the SD STEM Ed Conference! Please remember that you must submit all assignments by the due date listed in the syllabus in order to receive credit for the course. Please also note that there is no withdrawal date for courses running for 21 days or fewer, therefore once you register you will not be able to withdraw from this course. For more info, contact kim.webber@bhsu.edu or Nicole.UhreBalk@bhsu.edu at 651.485.1747

Order & pay for Conference swag (shirts, bags, cups &/or cap) by December 31 for no shipping charge when you pick-up your order at the conference.

Available with SD STEM Ed, SDCTM or SDSTA logo. Check SDCTM.org or SDSTA.org -or- <https://https-sungoldsports-com.printavo.com/merch/sd-stem-2026/>

– Next year's conference will be February 4, 5, & 6, 2027 –

The 2026 Conference Committee would like to offer a Special Thanks to . . .
Black Hills State University and Kim Webber & Nicole Uhre-Balk for handling the credit.

All speakers for their dedication to the future of mathematics and science education.

All exhibitors for their enthusiastic participation.

The Huron Area Chamber of Commerce, The Huron Convention and
Visitors Bureau for a great deal of help and cooperation.

The Huron Events Center & Crossroads Hotel for their help and generous hospitality.

All the conference participants who make all of our efforts worthwhile and without whom there would be no conference.

THANKS Sanford Health and PROMISE for the donation & sponsorship of our conference.

THANKS to Sanford for providing lanyards.

*??? THANKS to HL for sponsoring
the pre-Banquet Friday Social*

Next year's SD STEM Ed conference will be February 5, 6, & 7, 2027.

The 2026 February STEM Ed Conference is a joint venture of the South Dakota Science Teaching Association (SDSTA) and the South Dakota Council of Teachers of Mathematics (SDCTM). Note: There is a common registration form for the conference. One form is used to register for all activities, including SDSTA and SDCTM memberships. The best discount on the registration rate is Early Registration by Dec. 1st. There is still a discount for paid Pre-Registration between Dec. 2nd – Jan. 15th. Anything thereafter will be considered On-Site Registration. On-Site Registration rates are: ONE-day \$225, Students \$70 includes the Noon Luncheon for that day. TWO-days \$250, Students \$80 includes the Noon Luncheon for both days The Friday Night Banquet is NOT included in the registration fee. A ticket for the banquet may be obtained at an additional cost of \$35. {Registration & payment after Jan. 15th will be considered as on-site registration.}
Because of a limited printing budget, the program was available in advance at the SDCTM website [www.sdctm.org] or SDSTA website [www.sdsta.org].
The printed Schedule-at-a-Glance will be distributed on site with the registration materials.

2026 SD STEM Ed Conference

Sponsored by SDSTA & SDCTM

Please take time to respond to the following questions concerning the conference. This information will help the program committee take steps to improve future conferences.

Circle one in each group:

Your Content Area: Math Science Both STEM Other _____

Your Grade Band: Elementary Middle School High School College Other

Circle which no cost-to-you items you enjoyed; or X those we could do without:

Morning: donut holes & coffee; All day: pop; Other _____

What presentation or presentations did you feel were the most useful or helpful?

What made it (or them) good?

Were there any presentations that disappointed you?

Please give us your overall assessment of the conference along with any comments you would like to share.

Detach and fill in the following for a final prize to be sent after the conference. To register for the prize, turn in this entry along with your evaluation form (**or submit online**) . <https://form>

Name

Address

City, State, Zip Code

In South Dakota, the "Law of Conservation of Momentum" only applies
when you're trying to walk against a 50 mph wind in January.

How can you tell if a chemist is from South Dakota?

They think "P" on the periodic table stands for "Pheasant."

Which number is the most curious?

4—always asking "for?"

How do decimals start a conversation?

"Point taken."
