

# 2024 SDCTM Summer Symposium

## "The Identity, Joy, and Community of Mathematics"

Come build your identity as a mathematical thinker, find joy engaging in math tasks and be a part of a community of current and future math educators! Learn wise practices to create inclusive, collaborative classroom environments where students feel brave to share their cultural identity, develop their mathematics identity and see themselves as critical thinkers, resilient problem solvers, and confident mathematicians. Educators will engage in rich mathematics tasks, reflect on practices that engage students to build their creativity and curiosity of mathematics and have conversations with colleagues that allow for deeper reflection.

## Featured Presenter: Stephanie Hidgdon

CIRCLES Alliance Curriculum Development Facilitator and Library Director

July 16th, 2024

8am-4pm

Dakota  
Wesleyan  
University  
Room TBD
